NOTE

Signor Leone Ricci has spent twenty years in forming this collection, with the object of obtaining the finest and most beautiful examples of old and rare laces illustrating the art from the Renaissance, and especially notable for those of the Cinquecento and later periods. He had in mind their use for educational purposes through exhibition in a museum.

Imitations of these laces are attempted, but are easily classified as modern by an expert when compared with the originals. These originals are, owing to the time, care and skill required for the work, and the fact that the making is now in many cases a lost art, becoming more and more difficult to procure.

Attention is particularly called to the Altar Pieces. No such collection of Altar Frontals has been brought to this country heretofore. Each represents individual sacrifice on the part of the maker, whose one gift to the Church it was—who could often afford nothing else—but who could express in the making of these Altar Pieces the devotion and enthusiasm of personal service.

All the pieces in the collection, with a few exceptions, date from the Sixteenth and Seventeenth Centuries. In the case of the former, it has been noted invariably in the Catalogue, but in the latter, it has not always been considered necessary to mention it.
